

I just heard that Sinclair Broadcasting is attempting to force its stations throughout the country to broadcast an anti-Kerry documentary just before the election. This is an outrage. and a clear example of biased owners of a large media corporation abusing the financial power of a corporation to unduly influence an election.

Sinclair Broadcasting gets to use the public airwaves free of charge, and is obligated by law to serve the public interest. Forcing their stations to broadcast a politically motivated film before an election clearly shows they don't have the public interest in mind.

I strongly urge the FCC to intervene in this situation, and stop Sinclair's blatant attempt to influence the election. Thank you.
